Primary Examiner, Art Unit 1616

This Office action is in response to applicant's election of 1/21/2010. Applicant elected without traverse the invention of Group III, wherein compound of formula (I) is combined with the species prothioconazole. Applicant has also amended the claims to the elected invention Group III. The amended claims will be examined herein.

Subject matter pertaining to the elected species (formula (I) + prothioconazole) is deemed to be allowable. Examination is expanded to include the remaining subject matter.

The amended claims, as a whole, are deemed allowable.

The following is an examiner's statement of reasons for allowance: The claimed invention is directed to a fungicidal composition comprising an active compound combination *consisting of* the compound of formula (I)¹ and one or more of the triazoles for formula (IV-a), (IV-b) or (IV-c)². The prior art does not disclose such active compound combination(s) *consisting of* the claim-specified compounds. Moreover, applicant's data on specification Table 2 is sufficient evidence of nonobviousness. Combination of the triazoles tebuconazole and prothioconazole with the compound of formula (I) provided unexpected improvement over the efficacy of the individual agents. Therefore, the claimed invention *as a whole* is deemed to be allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

¹ Compound of formula (I) is known by its common name, isotianil.

² These compounds are known by their common names, triadimenol, tebuconazole, and prothioconazole.
